Discharge Instructions

Patient Name:

Description:

Owner Name:

Pet Weight:

_____ 's neuter procedure went well today. He was given medication for pain and discomfort during his procedure which lasts 24 hours.

General anesthesia was given to _____. Please assist him as needed when walking and moving around at home. Sleeping following anesthesia is not unusual, your pet should be recovered by tomorrow, if not please notify our office immediately.

Please feed a small meal later tonight, 1/4 of a normal size meal. Do not allow him to drink a large quantity of water at one time, restrict as needed. Report any vomiting or diarrhea.

Monitor _____ 's incision for any redness or swelling and prevent him from licking or chewing at his incision. Should he begin to lick or chew at the incision, please stop by an pick up an E-collar, this will prevent any risk of infection or removal of the sutures. If you notice any redness or swelling, please schedule a recheck appointment.

Limit _____ 's activity for the next two weeks, do not allow him to jump on or off elevated surfaces. Once his sutures are removed, he may return to regular activity.

Give medications as directed

Schedule an appointment in 10-14 days for suture removal with a Technician

_____ 's does **not** have sutures. Even without sutures, please monitor the incision for any redness and swelling. Limit activity for the next two weeks, do not allow him to jump on or off elevated surfaces.

If you have any questions or concerns please call 919-848-1926.
